Tyra Biosciences to Participate in Upcoming Investor Conferences

November 5, 2026

CARLSBAD, Calif., Nov. 5, 2026 /PRNewswire/ -- Tyra Biosciences, Inc. (Nasdaq: TYRA), a clinical-stage biotechnology company focused on developing next-generation precision medicines that target large opportunities in Fibroblast Growth Factor Receptor (FGFR) biology, today announced participation at the following investor conferences:

Guggenheim 3rd Annual Healthcare Innovation Conference 2026
Format: One-on-one investor meetings
Date/Time: November 10, 2026
Location: Boston, MA

Jefferies Global Healthcare Conference in London
Format: Hybrid presentation and one-on-one investor meetings
Presentation Date/Time: Monday, November 16, 2026 at 11:30 AM GMT

A live webcast of the Jefferies presentation can be accessed by visiting the "For Investors" page on the Tyra Biosciences **website** and will be available for replay following the event.

About Tyra Biosciences

Tyra Biosciences, Inc. (Nasdaq: TYRA) is a clinical-stage biotechnology company focused on developing next-generation precision medicines that target large opportunities in FGFR biology. TYRA's in-house precision medicine platform, SNÅP, enables rapid and precise drug design through iterative molecular SNÅPshots that help TYRA design and predict which candidates may demonstrate the highest potency, selectivity and tolerability in the clinic. TYRA's expertise in FGFR biology has created a differentiated pipeline with clinical-stage programs in targeted oncology and genetically defined conditions. TYRA's lead precision medicine stemming from SNÅP, oral dabogratinib, is a potential first-in-class selective FGFR3 inhibitor in development for low grade upper tract urothelial cancer, low grade intermediate risk non-muscle invasive bladder cancer and achondroplasia. TYRA is also developing TYRA-430, an oral, investigational FGFR4/3-biased inhibitor for FGF19+/FGFR4-driven cancers, in the SURF431 study for advanced hepatocellular carcinoma, and TYRA-200, an oral, investigational, FGFR1/2/3 inhibitor, in the SURF201 study for metastatic intrahepatic cholangiocarcinoma. TYRA is based in Carlsbad, CA.
